CHRISTEYE
LIVING PERIODIC TABLE

BIOLOGICAL · INFORMATION · QUANTUM · COSMIC SYSTEMS

FUNCTIONAL TAXONOMY / VERSION 0.6 / 03 NOV 2026

CLASSROOM RESEARCH REFERENCE

Not a replacement for the chemical periodic table; numbering is an index, not atomic number.

WE DEVELOP SOFTWARE LLC · CHRISTEYE FRAMEWORK

01 BIOLOGICAL CORE

7 cell classes + 6 anatomical, junction and functional modules

01 Nr	02 As	03 Ol	04 Sc	05 Mi	06 Ns	07 Nc
BASE	BASE	BASE	BASE	BASE	BASE	BASE
Nr	**As**	**Ol**	**Sc**	**Mi**	**Ns**	**Nc**
Neuron	**Astrocyte**	**Oligodendrocyte**	**Schwann cell**	**Microglia**	**Neural stem cell**	**Neural crest cell**
Integrates neural input; generates activity	Supports neural ions and metabolism	Forms central nervous system myelin	Peripheral myelin and repair support	CNS immune surveillance and clearance	Self-renewal and lineage specification	Developmental migration; diverse lineages
MEASURE e_correct ; J_ij	MEASURE ATP ; K+ flux	MEASURE g_m ; support flux	MEASURE v_cond ; recovery	MEASURE k_clear ; V_H	MEASURE r_diff ; viability	MEASURE lineage yield

HOW TO READ THIS TABLE

Each numbered tile identifies a functional entity or phenomenon, a short definition and a measurable parameter. The entries are not chemical elements.

NUMBER · SYMBOL · NAME · FUNCTION · MEASUREMENT

08 Ax	09 Mt	10 Sy	11 Rb	12 Ef	13 St
BASE	BASE	BASE	BASE	BASE	BASE
Ax	**Mt**	**Sy**	**Rb**	**Ef**	**St**
Axon	**Mitochondrion**	**Synapse**	**Ribosome**	**Effector module**	**Storage module**
Propagates spikes; transports cargo	Metabolic conversion supporting ATP	Chemical or electrical neural junction	Translates RNA into proteins	Specified signal to measured output	Retains material or energy reserve
MEASURE R_prop ; e_spike	MEASURE P_ATP ; Δψ	MEASURE J_ij ; P_release	MEASURE r_translation	MEASURE output flux ; yield	MEASURE capacity ; η

02 CONDITIONAL BIOLOGY

12 genetic, acellular and dysregulated biological entities

14 Vr	15 Pr	16 Vi	17 Di	18 Te	19 Pl	20 Ph	21 Ev
C/D	D	C/D	C	C	C	C/L	C
Vr	**Pr**	**Vi**	**Di**	**Te**	**Pl**	**Ph**	**Ev**
Viruses	**Pathogenic prions**	**Viroids**	**Defective viral genomes**	**Transposons**	**Plasmids**	**Bacteriophages**	**Extracellular vesicles**
Host-dependent genetic replicators	Self-propagating protein misfolding	Small infectious circular plant RNAs	Incomplete viral replication templates	Mobile genetic elements in genomes	Extrachromosomal genetic elements	Viruses that infect bacteria	Membrane-bounded molecular cargo
MEASURE entry ; k_clear	MEASURE k_seed ; k_clear	MEASURE r_rep ; damage	MEASURE interference ratio	MEASURE r_insert ; repair	MEASURE transfer rate	MEASURE adsorption ; burst	MEASURE uptake ; cargo

22 Bc	23 Se	24 Ca	25 Im
C/D	C	D	C/D
Bc	**Se**	**Ca**	**Im**
Biofilm communities	**Senescent cells**	**Cancer cells**	**Immune dysregulation**
Surface-associated microbial collectives	Growth-arrested cells with diverse roles	Cells with dysregulated growth control	Harmful or mistimed immune responses
MEASURE biomass ; clearance	MEASURE SASP ; k_clear	MEASURE growth ; invasion	MEASURE cytokines ; V_H

03 SUBTLE LIVING WINDS

12 natural signaling, sensory and response phenomena

26 CB-01	27 LW-02	28 LW-03	29 LW-04	30 LW-05	31 LW-06
C	C	C	C	C	C
Cb	**Le**	**Nw**	**Rm**	**Fc**	**Uc**
Creative bloom	**Leaf lightning**	**Neighbor whisper**	**Root response memory**	**Flower current**	**Ultrasonic clicks**
Cannabis-associated perceived creativity	Plant electrical and calcium signaling	Volatile-mediated plant interactions	Habituation-like changes after input	Floral electric fields sensed by bees	Ultrasonic emissions from stressed plants
MEASURE subjective / objective	MEASURE ΔV ; Ca2+ flux	MEASURE VOC flux ; response	MEASURE R_U(t)	MEASURE E_field ; accuracy	MEASURE click rate ; Hz

SUBTLE EFFECTS ARE TESTABLE

Electrical, chemical, sensory and circadian effects can be measured even when mechanisms remain incomplete. “Spirit” and “Winds” are ChristEye analogies, not established physical forces.

SEPARATE OBSERVATIONS FROM INTERPRETATION

32 LW-07	33 LW-08	34 LW-09	35 LW-10	36 LW-11	37 LW-12
C	C	C	C	C	C
Fv	**Mn**	**Up**	**Ge**	**Cr**	**Mg**
Forest volatiles	**Mycorrhizal networks**	**Ultraweak photons**	**Geosmin scent**	**Circadian rhythms**	**Magnetoreception**
Biogenic airborne molecules in forests	Fungal-root resource partnerships	Faint emission from biological reactions	Microbial odorant linked to soil smell	Endogenous plant timing and movement	Magnetic-field sensing in animals
MEASURE VOC concentration	MEASURE transfer flux	MEASURE photon flux	MEASURE odor threshold	MEASURE phase ; period	MEASURE B ; heading error

04 QUANTUM AND RADIANT PHYSICS

5 quantum + 6 radiation and particle phenomena

38 QW-01	39 QW-02	40 QW-03	41 QW-04	42 QW-05
PHYS	PHYS	PHYS	PHYS	PHYS
Qe	**Qt**	**Qs**	**Qv**	**Qp**
Entanglement	**Tunneling**	**Superposition**	**Vacuum fluctuations**	**Topological edges**
Nonclassical correlations of quantum states	Quantum transfer through energy barriers	Coherent combinations of quantum states	Ground-state field effects and forces	Robust edge transport in some materials
MEASURE Bell parameter S	MEASURE P_T	MEASURE visibility ; T2	MEASURE Casimir F_C	MEASURE G ; conductance

MEASURABLE PHYSICS

Quantum coherence, particle flux, binding affinity and neural energy efficiency have different units. Compare them through models with explicit boundaries and validated relationships.

NO SINGLE UNIVERSAL “UNDERSTANDING” COEFFICIENT

43 RW-01	44 RW-02	45 RW-03	46 RW-04	47 RW-05	48 RW-06
PHYS	CONTEXT	PHYS	PHYS	PHYS	PHYS
Pt	**Ir**	**Fl**	**Ch**	**Nu**	**Cy**
Photons	**Ionizing radiation**	**Fluorescence**	**Cherenkov light**	**Neutrino oscillation**	**Cosmic rays**
Quanta of electromagnetic radiation	Energy deposition and chemical damage	Photon absorption and re-emission	Emission from fast charges in a medium	Flavor-state changes during propagation	High-energy particles from space
MEASURE E = hν	MEASURE dose Gy ; LET	MEASURE quantum yield	MEASURE βn > 1	MEASURE P_flavor	MEASURE particle flux Φ

05 ANTIMATTER AND COSMIC SYSTEMS

3 antimatter + 5 spacetime / astronomy phenomena

49 AW-01	50 AW-02	51 AW-03
PHYS	PHYS	CONTEXT
An	**Ah**	**Pi**
Annihilation	**Antihydrogen**	**PET imaging**
Matter-antimatter energy conversion	Bound state of antiproton and positron	Positron-derived photon detection
MEASURE E_total ; σ	MEASURE transition ν	MEASURE SUV ; sensitivity

CROSS-SCALE BRIDGE

MOLECULAR INTERACTIONS → CELLULAR NETWORKS → QUANTUM STATES → SPACETIME. A systems analogy can organize questions, but does not make these mechanisms physically equivalent.

PHYSICAL CONSERVATION LAWS STILL APPLY

52 CW-01	53 CW-02	54 CW-03	55 CW-04	56 CW-05
PHYS	PHYS	PHYS	PHYS	PHYS
Ac	**Gw**	**Eh**	**Hr**	**Cm**
Accretion flows	**Gravitational waves**	**Event horizons**	**Hawking radiation**	**Ancient light (CMB)**
Matter transport near compact bodies	Propagating spacetime strain	Black-hole causal boundaries	Predicted black-hole thermal emission	Early-universe radiation anisotropies
MEASURE mass rate ; η	MEASURE strain h(t)	MEASURE radius r_s	MEASURE T_H (theory)	MEASURE ΔT/T

CHRISTEYE COMPONENT LEXICON

SOUL
Integration and continuity of an organized whole.

HEART
Functional needs, targets and viability.

LOTUS
Processing, sensing and coordinated action.

SPIRIT / KNOWLEDGE
Proposed label for driving input or process advance.

MARROW
Inherited information, structure and integrity.

UNDERSTANDING
Measured reliability, response, endurance, recovery.

JOINTS
Contact points: synapses, interfaces and binding.

THOUGHTS
Observed internal activity / functional patterns.

WINDS
Electrical, molecular and physical flows.

INTENTIONS
Goal-defined input-to-output mapping; not agency.

ROOTS
Stored resources, history and learned parameters.

MEASUREMENT COEFFICIENTS

COEFFICIENT	MEANING	UNITS
k_on	Association / binding rate	$M^{-1}s^{-1}$
k_off	Dissociation rate	s^{-1}
K_D	Equilibrium dissociation constant	M
J_ij	Synaptic gain relative to baseline	unitless
e_corr	Energy per correct neural response	J / response
G_E	Energy-efficiency improvement	unitless
R_U	Learned performance retention	unitless
V_H	Healthy-cell viable fraction	0–1
D_H	Host impairment index (proposed)	unitless
A_H	Life-alignment score (proposed)	unitless
σ	Interaction cross-section	m^2
Φ	Particle / photon flux	$m^{-2}s^{-1}$
λ	Exponential decay coefficient	s^{-1}
T_1 / T_2	Quantum relaxation / coherence times	s
P_T	Quantum tunneling probability	0–1
h(t)	Gravitational-wave strain	unitless

STATE & EQUATION REFERENCE

BINDING
$d[AB]/dt = k_{on}[A][B] - k_{off}[AB]$

AFFINITY
$K_D = k_{off} / k_{on}$ (simple 1:1 model)

EFFICIENCY
$e_{corr} = E_{total} / N_{correct}$

TRAINING GAIN
$G_E = 1 - e_{after} / e_{before}$

HOST ALIGNMENT
$A_H = w_F \Delta F_H + w_V \Delta V_H - w_D \Delta D_H$

DECAY
$N(t) = N_0 \exp(-\lambda t)$

PHOTON ENERGY
$E = h\nu$

HOST EFFECT CLASSIFICATION (CONTEXT DEPENDENT)

D DAMAGE	C CONDITIONAL	L LIFE SUPPORT
Measured harm	Depends on context	Benefit to healthy function

Classification uses a defined host, exposure, outcome and control.

TEACHING NOTE · ChristEye mappings and the A_H / R_U scores are proposals; no literal spiritual force, moral property or universal life/death law is established.
